WORK EXPERIENCE

Senior Software Engineer Seventh Ave

03/2021 - 03/2023

United States

Hired as a Software Engineer to assist with application architecture and development with React Native. Currently the lead frontend developer.

Achievements/Tasks

- Built the audio/video experience feature. This feature allows you to create/join a virtual room and have live conversations with other people in that room.
- Designed and built a socket server for the audio/video experience feature (backend). This server is responsible for handling live room events such as muting yourself or others, creating moderators, adding/removing participants and much more.
- Helped build a feed so users can share posts, images and videos (frontend). I built most of the feed components which included shared social media posts, website posts and gallery posts (photo and video). I also built the ability to like a post as well as save a post to a user defined collection. (Deprecated due to change in company direction).
- Built the question and answer feature (frontend). This feature allows a user to post a question in the app anonymously and have other users answer that question with either text, audio or video.
- Built the group chat feature (frontend and backend). This feature allows users in an online space/community to send messages, images, videos, links and gifs to other participants in the space.
- Built the communities feature (frontend and backend). This feature allows you to join/create an online space within the app that has its own group chat, live conversations and question/answer section.

Founder/Solo Engineer Merchive

09/2020 - Present

Barbados

Successfully built my own local e-commerce platform Merchive in 3 months which is still used today by local small business owners.

Achievements/Tasks

- Built a feature to allow users to directly send a WhatsApp message with the product they are viewing to the store owner.
- Added a live messaging feature using Redis and Firebase so customers and store can communicate.
- Added thousands of categories to choose from for more specific product filtering.

SKILLS

React DOM

React Native

Typescript

Redux

Nextjs

Express

Nestjs

MongoDB

GIT

Docker

Linux

GraphQL

REST

Figma

PERSONAL PROJECTS

Merchive (09/2020 - Present)

- Built a local e-commerce platform called Merchive in 3 months by myself using React, Node, MongoDB and Docker/Kubernetes. Dev Ops has been done by myself as well using Travis and Github Actions for continuous integration. Utilizes both AWS and GCloud services.

INTERESTS

React Native

Animations

Typescript
